What is Six Sigma?

Everyone in the business community is talking about it. It all started at Motorola, where the Six Sigma program was crafted as a means for measuring defects and improving quality. This methodology of management that reduces defect errors to below 3.4 Defects Per Million Opportunities (DPMO).

Simply stated, an improved product delivered more efficiently creates increased positive consumer response, which ultimately achieves increased revenue. From manufacturing to transactional and from product to service, this highly successful methodology has achieved almost legendary success wherever it has been implemented.

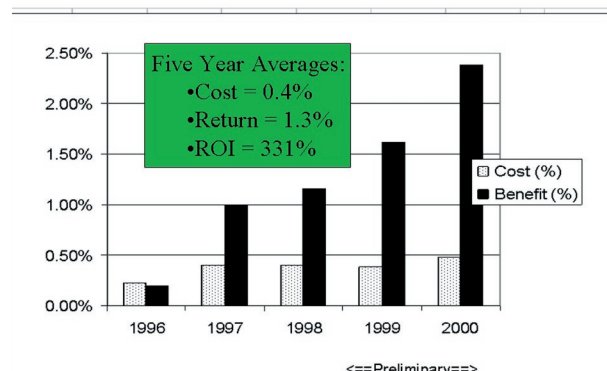

Shouldn't you be using Six Sigma?

Today's business requires a competitive edge — functioning with greater efficiency, profitability and consistency. The Six Sigma program helps firms attain and sustain a level of business perfection through the identification of problem areas and resolution of the issues via customer-focused analytical methods. With the Six Sigma program, delivering a quality product translates to repeat business and increased sales.

Who Uses Six Sigma?

Firms that have employed the Six Sigma program include: General Electric, Amazon.com, 3M, Bank of America, Advanced Micro Devices, Caterpillar, Inc., Starwood Hotels & Resorts, and many more.

GE's Six Sigma Business Results

The four most popular levels of Six Sigma training are offered through the HTECH — Vincennes University Partnership

Executive — (1 day training)

This level is responsible for establishing the vision for Six Sigma implementation. They empower the other role holders with the freedom and resources to explore new ideas for improvements.

Black Belt —

(20 days + Cross Functional Project)

This level of management applies the Six Sigma methodology to the specific projects. They devote 100% of their time to Six Sigma project execution.

Green Belt — (10 days + Local Project)

Green Belts are employees who assume the Six Sigma implementation along with their other responsibilities and work under the guidance of the Black Belts working to achieve the overall results.

Yellow Belt — (3 day training)

This level of training gives employees a greater understanding of the process, allowing each to provide meaningful assistance in achieving the firm's Six Sigma goal.

Funding is available through State of Indiana Offices:

Vincennes University and Indiana's Department of Workforce Development work together to ensure that Indiana employers have a competitive and flexible workforce by providing Hoosiers with opportunities and support to gain knowledge and skills for sustained employment in the global economy.

Training Acceleration Grant (TAG)

This grant is administered via a partnership between the Indiana Department of Workforce Development and the Indiana Economic Development Corporation. The grant provides financial assistance to companies and organizations committed to expanding the skills of their existing workforce through training programs.

For more information on the Six Sigma program and possible tuition assistance via the training acceleration grant, contact:
